Base-Surplus Computation No. 1

The following draft of computations to be inserted in connection with section 1 of article VIII is suitable for a market plan having the following characteristics:

- (a) A base-surplus plan;
- (b) No country plants and all milk is delivered f.o.b. distributors' plants in the Sales Area.

(Cut here)

Section 1. Computations. With respect to each delivery period, the Market Administrator shall:

1. Compute the total value of the milk reported by each and all distributors pursuant to article VI on the basis of the classification and prices set forth in articles IV and V respectively, which computations shall not include milk or the value thereof (1) as purchased by distributors from other distributors except as set forth in paragraph 1, section 2 of article IV, (2) as excluded from such computations pursuant to the provisions of article VII, or (3) if classified as emergency milk pursuant to section 3 of article IX.

2. Compute the total quantity of milk which represents the delivered bases of producers (excluding new producers) and which is included in the computations pursuant to paragraph 1 of this section.

3. Compute the total value of the milk (including all milk delivered by new producers) which is in excess of the delivered bases determined pursuant to paragraph 2 of this section and which is included in the computations pursuant to paragraph 1 of this section, by multiplying such quantity of milk by the price specified for Class III milk in section 1 of article V.

4. Compute the total value of the quantity of milk represented by the delivered bases of producers by subtracting the value obtained in paragraph 3 of this section from the value obtained in paragraph 1 of this section.

5. Compute the blended price for the quantity of milk represented by the delivered bases of producers by dividing the value obtained in paragraph 4 of this section by the quantity of milk represented by the delivered bases of producers as determined in paragraph 2 of this section, which blended price shall be subject to adjustments as set forth in section 2 of this article.

Base-Surplus Computation No. 11

The following draft of computations to be inserted in connection with section 1 of article VIII is suitable for a market plan having the following characteristics:

- (a) A base-surplus plan;
- (b) Country plants operated by distributors so that freight charges are to be made.

Section 1. Computations. With respect to each delivery period, the Market Administrator shall:

1. Compute the total value of the milk reported by each and all distributors pursuant to article VI on the basis of the classification and prices with adjustments as set forth in articles IV and V, respectively, which computations shall not include the milk or the value thereof (1) as purchased by distributors from other distributors except as set forth in paragraph 1, section 2 of article IV, (2) as excluded from such computations under the provisions of article VII, or (3) if classified as emergency milk pursuant to section 3 of article IX.

2. Compute the total quantity of milk which represents the delivered bases of producers (excluding new producers) and which is included in the computations pursuant to paragraph 1 of this section.

3. Compute the total value of the milk (including all milk delivered by new producers) which is in excess of the delivered bases determined pursuant to paragraph 2 of this section and which is included in the computations pursuant to paragraph 1 of this section, by multiplying such quantity of milk by the price specified for Class III milk in section 1 of article V.

4. Compute the total value of the quantity of milk represented by the delivered bases of producers by subtracting the value obtained in paragraph 3 of this section from the value obtained in paragraph 1 of this section.

5. Compute the total adjusted value of the milk represented by the delivered bases of producers by adding to the value obtained in paragraph 4 of this section, the adjustments set forth in section 5 of article IX.

6. Compute the blended price for the quantity of milk represented by the delivered bases of producers by dividing the adjusted value obtained in paragraph 5 of this section by the quantity of milk represented by the delivered bases of producers as determined in paragraph 2 of this section, which blended price shall be subject to adjustments as set forth in section 2 of this article.

Blended Price Computation No. 1

The following draft of computations to be inserted in connection with section 1 of article VIII is suitable for a market plan having the following characteristics:

- (a) A blended price for all milk (no base-surplus plan);
- (b) No country plants and all milk is delivered f.o.b. distributors' plants in the Sales Area.

Section 1. Computations. With respect to each delivery period, the Market Administrator shall:

1. Compute the total value of the milk reported by each and all distributors pursuant to article VI on the basis of the classification and the prices set forth in articles IV and V respectively, which computations shall not include the milk or the value thereof (1) as purchased by distributors from other distributors except as set forth in paragraph 1, section 2 of article IV, (2) as excluded from such computations pursuant to the provisions of article VII, or (3) if classified as emergency milk pursuant to section 3 of article IX.
2. Compute the total quantity of milk which is included in the computations pursuant to paragraph 1 of this section and which does not represent deliveries by new producers.
3. Compute the total value of the quantity of milk which was delivered by new producers and which is included in the computations pursuant to paragraph 1 of this section by multiplying such quantity of milk by the price specified for Class III milk in section 1 of article V.
4. Compute the total value of the quantity of milk determined pursuant to paragraph 2 of this section by subtracting the value obtained in paragraph 3 of this section from the value obtained in paragraph 1 of this section.
5. Compute the blended price by dividing the value obtained in paragraph 4 of this section by the quantity of milk determined pursuant to paragraph 2 of this section, which blended price shall be subject to adjustments as set forth in section 2 of this article.

Blended Price Computation No. II

The following draft of computations to be inserted in connection with section 1 of article VII is suitable for a market plan having the following characteristics:

- (a) A blended price for all milk (no base-surplus plan);
- (b) Country plants operated by distributors so that freight charges are to be made.

Section 1. Computations. With respect to each delivery period, the Market Administrator shall:

1. Compute the total value of the milk reported by each and all distributors pursuant to article VI on the basis of the classification and the prices with adjustments as set forth in articles IV and V, respectively, which computations shall not include the milk or the value thereof (1) as purchased by distributors from other distributors except as set forth in paragraph 1, section 2 of article IV, (2) as excluded from such computations pursuant to the provisions of article VII, or (3) if classified as emergency milk pursuant to section 3 of article IX.
2. Compute the total quantity of milk which is included in the computations pursuant to paragraph 1 of this section and which does not represent deliveries by new producers.
3. Compute the total value of the quantity of milk which was delivered by new producers and which is included in the computations pursuant to paragraph 1 of this section by multiplying such quantity of milk by the price specified for Class III milk in section 1 of article V.
4. Compute the total value of the quantity of milk determined pursuant to paragraph 2 of this section by subtracting the value obtained in paragraph 3 of this section from the value obtained in paragraph 1 of this section.
5. Compute the adjusted value of the quantity of milk determined pursuant to paragraph 2 of this section by adding to the value obtained in paragraph 4 of this section, the adjustments set forth in section 5 of article IX.
6. Compute the blended price by dividing the adjusted value obtained in paragraph 5 of this section by the quantity of milk as determined pursuant to paragraph 2 of this section, which blended price shall be subject to adjustments as set forth in section 2 of this article.

(Transportation and country plant differentials - Article V)

Sec. 2. Adjustments in Cost of Milk to Distributors. Each distributor shall, subject to the conditions set forth in paragraph 2 of this section, make the following deductions from the prices set forth in section 1 of this article:

1.

2. Unless the prior written consent of the Market Administrator is obtained for some other basis of computation, Class I and Class II milk for each distributor shall be deemed to have been taken in the order above named from milk delivered to such distributor at plants within and nearest to the Sales Area.
